CEO
(Code number: 6200, Prime Market of the
Tokyo Stock Exchange)

**Insource starts offering “Professional English Conversation,”
a new course for the English learning application “Recipe”
- Easy and inexpensive way to learn practical English conversation required for each profession
and situation -**

Insource Co., Ltd., (hereafter referred to the Company), a company that helps organizations solve problems through the power of education and IT, announces that we have recently begun offering “Professional English Conversation,” a new course of the English-language learning application “Recipe” by POLYGLOTS, Inc. (hereafter referred to POLYGLOTS), which is our alliance.

In learning English for working adults, there are many programs that provide general-purpose English expressions used in common business situations, such as meetings, presentations, and negotiations. However, the current situation is that the English used in business situations varies greatly depending on the profession, situation, and other factors. In addition, English learning programs themselves are expensive, and there are cases where such programs are offered only to a limited number of employees.

“Professional English Conversation” is one of the most practical and easy-to-use courses in the “Recipe” English learning application. The English conversations required for each profession and scene, such as hotels, restaurants, and international tourists, are available so that employees will be able to acquire the necessary expressions at a reasonable cost and efficiently according to the situations in practical business. Similar to “Recipe”, we provide a vocabulary notebook function and leading articles to improve attendees’ basic English skills, as well as a function to assess weaknesses and provide individually optimized curricula through high-performance AI. Attendees can accumulate small training with no pressure, and in addition to acquiring the necessary wording in practical business, they can acquire comprehensive English skills. This course will provide opportunities to raise the level of practical English skills of the necessary personnel, including part-time workers.

<Service Overview>

◆POLYGLOTS "Recipe"

This is a next-generation English training service for busy businesspeople to acquire business English as quickly as possible. As of 2023, the cumulative number of users exceeded 2 million, with a renewal rate of 90% or more. Everything through the smartphone application for employees, including input from application self-study, output from English conversation lessons, and coaching services for overseas assignments, will be available. By combining the strengths of "AI" and "English-speaking trainers", attendees are able to raise the level of their curricula through individual optimization. The same results can be achieved in about 67% of the time it used to take to learn English.
